*aIf the difference between two variety yield or test weight values equals or exceeds the LSD values, there is a 70% chance the difference is significant. Variety yield and test weight in bold are in the top LSD group.

**Site Information**

Collaborator: Kramer Farms
Harvest date: July 8, 2020
Planting date: October 7, 2019
Soil Type: Norka silt loam
GPS Coordinates: 39.38035, -102.15222
Trial Comments: Planted in early October after corn harvest into tilled corn stalks. Stand establishment was excellent and trial was watered within a few days of planting. In late-April trial was about a week from jointing and had good soil moisture due to recent irrigation. Stopped watering in mid-June. A mid-April hard freeze caused moderate damage to heads and leaves.
